An intuitive password recovering tool for PowerPoint documents. Recovers and decrypts your password protected PowerPoint files. Recover Lost PowerPoint Password with only the selected files. Recover password Protected PPT files by only viewing your In an effort to provide better security to its users, Evernote allows you to have multiple user accounts which are managed under one account. An Evernote account is protected by your phone's fingerprint or by passcode. Using different users we can store different types of information. For example, you can keep your work space (Evernote) private, and share notes with your co-workers. You can store your private notes for yourself, but share your work spaces with the rest of your group. Alternatively, keep your work spaces private, but use them as channels to

---

share with the whole group. We should also keep in mind that users can be invited to our shared work spaces, where they can see all the notes stored within our account. So it's really important that we keep all our work spaces private. If you want to invite others to your shared work spaces, you need to set them as an external user. 1. Go to "Home" and click on "Users". 2. Click on the "Manage" tab. 3. In the left pane click on the "External" button. 4. Search for your user account. 5. Select it and click on the "Add" button. 6. Now you should be able to invite people to your work spaces, view their profiles and note that they are assigned to a specific work space. You can also edit your external user settings anytime you want to. If you delete a user from your external users, your user account will also get deleted. To remove or invite someone to your external users: 1. Click on "Profile". 2. Click on "People". 3. Find the person you're trying to remove. 4. Click on the
