Can you believe that we are at the end of another year already? It seems that time flies faster and faster, and for this reason, all those resolutions that we made a few months ago have already come to naught. In other words, it's now time for a fresh start. The only way to put a stop to this mad race and to make a lasting change in our lives is to start thinking about the future and to plan ahead. Thus, here we are, to help you with all the necessary tips and tricks to make a perfect 2018. Make an action plan. The first step towards success is to write down everything you'd like to do in the new year. Also, it's a good idea to think about your goals, especially those which will require you to change something in your life. Your plan should include certain activities and plans that will help you reach those goals. Keep it realistic and well-defined to avoid stress and make sure that you stick to it. Track your progress. On a daily basis, it's a good idea to check your progress. Are you on track with the plan you made? Do you need to make any changes? If your resolution seems to be slipping, it might be a good idea to review your progress. Although that will not be easy, you should not give up. Instead, you should think about why you are not succeeding in your plan and try to figure out a possible reason. Break it down. Remember that your success is all about making small but smart changes. If you find that your plan is too big to work in, try breaking it down into smaller actions. This might seem a bit tricky at first, but it will help you to make sure that you stick to your plan, since it will be much easier to take a small step than a huge one. Also, don't forget to reward yourself. You should think about something to do for yourself, once you reach the target you set. Go out of the way. Sometimes

Word List is an application that analyses a selected file to provide information about the most frequently used words, alphabetically, as well as by frequency and percentage. The obtained information can be saved to an ASCII text file, so you can then view it on your favorite text editors. Word List is a simple tool that makes it possible to find the most used words in any file, whether it's a complete document, a single paragraph or even a single word. While Word List can analyze anything, it is primarily designed to be used with Microsoft Word documents. All options are easily configurable, so you can also be a bit more specific and find out which words are most often used in a specific sub-folder of your folder, for instance. The results can be saved to a text document, displayed in tabs, sorted alphabetically and by frequency or, with no options, viewed as a list of the most used words. Word List is delivered as a zip file and requires no installation, so you can get to work right away without any hassle. Slideshare uses cookies to improve functionality and performance, and to provide you with relevant advertising. You can edit words with a few mouse clicks and with little or no effort. I'm talking about options to change parts of words such as hyphenation, added/deleted/modified vowels or add/delete/modify letters. It is a wonder how tiny text can be so fruitful. You are allowed to create a new document with a few clicks. You just have to type "copy" and a new document appears where you have a choice to paste the last paragraph or leave it blank. The commands and the options at your disposal are clearly documented. There are no "hassle" options that are not explained in the guide. It is a very slim utility that can quickly become useful when you have to deal with many files and don't want to waste time opening them one by one. I was surprised by the simplicity, but the features of this application are quite complete. MaxMac - Windows and Mac alike version of Maximize Word...
