Spy Traffic Free

Some programs are in the top of the download list because they are more useful than the others. And this is definitely true for Spy Traffic Cracked Version. This program comes in and makes your life easier by allowing you to keep an eye on your Internet usage. Spy traffic is program that allows you to watch what programs you are

downloading and even what websites you are browsing. It allows you to take advantage of a certain unique functionality of your router and turn it into a spy. You can turn it on or off, set a limit of how much a day a user can use the Internet or even track a specific website. Most people have no idea that they are using up so much of their monthly data plan when downloading those movies and TV shows. In fact, some people have even fallen victim to so called “spy ware”. “Spyware” usually comes in the form of a virus that will allow a third party to spy on your surfing habits. But with

Spy traffic, you can turn this around. You have the ability to control and monitor your activities with this software. What do you think about Spy traffic? Is it a useful software? Please share with others. TrackEvents.com is a program that can help you to monitor and see the current status of your network traffic. It can work with the following types of connections: Dial-Up, CDMA, ADSL, GPRS, WiFi, Satellite internet, Bluetooth. The given program shows the current status of connection, conducts the extended statistics about all parameters of connection. It is possible to limit the

use of Internet services by traffic, time or budget. The system of notifications about the current status of connection is also present, allowing to inform by the sound signal, to show the report or tear communication. It can help you start applications depending on the state of your connection. The support of plugins allows you to extend the functionality of the program. TrackEvents.com
