The EmailTray, or EMT, is a tool that can conveniently manage and organize emails. Up to 500 Outlook Express emails can be managed in several categories: a contact list, a message list, a task list, a categorized folder and a global search list. Moreover, you are able to organize the emails by date, sender, subject or the subject of the message. You can set up the sorting so that you get the newest messages from a particular sender first. You can also choose from a variety of views, such as Inbox view, contacts view, vCalendar view or local and world-wide address lists view. A lot of program settings are available, including configuring the message preview pane, where you can set the relative width or height of the preview pane. You can adjust its view as well, set the background color and set your screen saver settings. A relevant security feature is also incorporated in the software. If any of your configured email accounts have been phished, you can now block the mail account without having to delete the email altogether. The EmailTray is available in Free and Home editions as well as for macOS. However, the latter lacks some features, including the ability to create email categories and a mobile device app. MetroCopy is an automatic back-up manager for one or multiple source folders. It copies everything that's in the folders. Applying to the source folders, it copies or creates tar, zip, JPG, MP3, MKV, WMV, MPEG, VOB, GIF, PNG and BMP files. Moreover, all the files in the folder are saved with a size, modification date, modification and access date. Additionally, the tool is able to save the content of any open program in the folder(s). You can also obtain the list of the files in the target folder and the source folders. Applying to the target folder, MetroCopy transfers all the files in the source folders to it. You can only select the folders containing the files you want to back-up. The folder for this purpose is created in the root folder (the Desktop). The tool supports the drag-and-drop option, in which you can add or remove source folders. Additionally, you can undo the previous action or perform a partial backup. MetroCopy also includes a program scheduler that allows you to set the recurring tasks with the option to complete them on certain days or at certain times. The app
