Like most CAD programs, AutoCAD Serial Key offers drafting and other essential drafting capabilities for a number of different professions and organizations. The program also contains a large assortment of additional features to support the user in the various stages of the design process. AutoCAD is currently available as AutoCAD LT and AutoCAD Standard (in 2009, the commercial desktop version, AutoCAD, was released and AutoCAD LT was released as a separate tool). AutoCAD LT and AutoCAD Standard, as well as most AutoCAD components, are sold by Autodesk as subscription-based products, allowing the user to use the software for the lifetime of the subscription. Unlike AutoCAD LT and AutoCAD, AutoCAD Premium, AutoCAD Architect, AutoCAD LT Architect, and some of the parts of AutoCAD Premium and AutoCAD Architect are sold by Autodesk as perpetual licenses. Contents show] History Edit AutoCAD and AutoCAD LT Edit AutoCAD and AutoCAD LT have been continually developed since the 1980s. AutoCAD (1992) and AutoCAD LT (1993) were the first versions released as part of the AutoCAD LT package. The 1992 release of AutoCAD introduced the concept of more than one drawing tab. AutoCAD LT was developed to address the need for a professional-grade drafting tool that is quick and easy to learn and use. The user interface of AutoCAD LT was based on a unique hierarchical, tabbed interface that was very different from the single-document, task-based interface of the original AutoCAD. AutoCAD, AutoCAD LT, AutoCAD LT Architect, and some of the parts of AutoCAD Premium and AutoCAD Architect are sold by Autodesk as perpetual licenses. In 2009, Autodesk introduced a new version of AutoCAD LT—AutoCAD LT 2010. The new release brought significant enhancements to the program that were introduced in earlier versions of AutoCAD LT. New features include: Multi-device Pen profile tool (G-Code) Support for Autodesk® Map 3D Updated User Interface Autodesk® Structure Autodesk® Dynamic Input Autodesk® Tabletop Support for Autodesk® Revit® Support for Autodesk® Kiara® Autodesk® Invent
