Programming environments Autodesk provides several programming environments for Python, Visual Basic and C++. Some of the basic use cases are described below:

- Python** Python (formerly called TinyBASIC) was introduced in 1992 as the programming language used in AutoCAD Full Crack to control the features of the program. It is similar to BASIC and FORTRAN, though it is not object oriented.
- VBA** Visual Basic for Applications is a programming language used for automation of worksheet functions in Excel. It has no direct relationship to AutoCAD Full Crack.
- C++** Microsoft Visual C++ for AutoCAD is a Visual Studio-based IDE providing access to AutoCAD's object-oriented database of AutoCAD's programming interface. A component of Visual Studio (C++ Builder), it requires the Microsoft Windows.NET Framework to operate.

Add-ons AutoCAD has add-ons for its AutoLISP and Visual LISP functions. An add-on is a type of plug-in that can be automatically installed, and are called AutoCAD Plug-ins. Visual LISP is a programming language primarily used to create AutoCAD add-ons. It was developed in the 1970s as part of the Xerox PARC System Development Group, after the AutoCAD original author, Bill Hewlett, noticed the development of the Lisp language.

**NetWorker** In AutoCAD, the .NET development environment is provided by the AutoCAD Add-in for Microsoft Visual Studio.NET. The NetWorker development environment provides access to the database and programming interface of the AutoCAD program. Unlike AutoCAD add-ins, the NetWorker plug-in can be installed, uninstalled and updated via the AutoCAD management system, unlike the AutoCAD add-ins which require reinstallation. It uses Visual Studio.NET as a development environment. A NetWorker plug-in is installed in a manner similar to the installation of a Microsoft Windows application, by running the .NET Framework installer. NetWorker plug-ins are supported in AutoCAD 2013 and AutoCAD LT 2013, using the .NET Framework 4.0. NetWorker provides two distinct interfaces, one for regular plug-ins and one for Visual LISP plug-ins. The .NET Framework 4.0 and the AutoCAD 2013.NET plug-in ca3bfb1094
