It is a card simulator that can change the way you consult your oracles. Choose the type of oracle, and consult it. The game is free and open source, it is maintained with free time and passion, I hope you enjoy this game and that it can contribute positively to your life. Unmatched oracle simulator... Nestor Castillo Jun 05, 2016 4.06 I've used game dev environments for ages and had lots of fun. Now I'm trying the same using dota2 and it's also fun and exciting. Never felt disappointed in the games I used to use. Concerning the software: The graphics look fantastic even when using the medium settings. The interface is really well done and comfortable to use, the options are simple and intuitive. The games are very solid and a great experience. Thank you to everyone who has worked on this project. Great software to create your own oracles. Nestor Castillo Jan 14, 2016 4.05 As a tarot enthusiast and tarotist, I love the concept of creating my own "oracle". I especially like how you can tweak the size of the oracle and can add illustrations on it. It's very easy to use, easy to adjust and has great user interface. I think it's great and I'm very happy you've finished this software. I hope you continue with updates and features in the future! ORACLES - A tarot meets a video game. Nestor Castillo Jan 12, 2015 4.05 This is great software. It is simple, fast, intuitive, and easy to use. If you are someone who plays or likes games like minecraft, dota 2, LoL or any other similar games, this is a must have software. The graphics are really nice and you can easily add your own images. I have only one small suggestion: it would be really cool to add a slider so you can adjust your camera to see more or less cards on the table. Anyway, I am very satisfied with the oracles and games. Thank you for doing this great work. PS. I would like to add a 5 star rating, but only because 4.4 stars is not good enough. Thank you. Verified Purchase: No Thank

## **What's new in Blood Bowl 2 - Amazon:**

**Highway Wars is a 1987 action-adventure film directed by Martin Brest and starring Robert Redford, Joe Pesci and Faye Dunaway. They co-wrote the script. In the film, a rude, yet honest cop (Pesci) is sent to an urban neighborhood to arrest a bank robber (Redford) he thinks may have a connection to a missing witness (Dunaway). Plot In the opening scene, Brooklyn Police Detective Sgt. Vincent Megalatro (Robert Redford), a recently-promoted lieutenant, drives drunk and ends up crashing his car. As he learns of the near-fatal accident, he pulls himself together and recovers his police badge. He sits with a friend at her home, leaving his cell phone on the front porch. As soon as he leaves the house, the wrong number comes on the line. Megalatro takes the call, but disappears soon after. As Megalatro walks in a quiet Midwood section of Brooklyn, a frustrated store clerk explains to him what's happened in the neighborhood: a young bank robber was recently caught on a security camera vanishing a woman who's seen his getaway car and may hold the key to finding him; he is also guilty of a burglary and assault of a woman. Megalatro agrees to take on the job, and breaks out a map of that part of the borough. Megalatro makes his way to pick up some necessary equipment. As he does, he spots a pimp's Cadillac Escalade. He walks into a seedy neighborhood barbershop and meets a friendly store owner who gives Megalatro a haircut. The bank robber is being kept at the precinct until a trial date is set. Officer Hyman (Joe Pesci) grabs Megalatro and sits him down. Hyman is convinced that the getting-to-of-the-bank-robber has something to do with a witness who bailed out on him. Megalatro knows this to be the case but is impressed by Hyman's persistence. Hyman witnesses the now-blind man walk away from the precinct. He looks up at the clock and notices that they have ten minutes before the bank closes. Convinced that a quick route through the Brooklyn Botanic Garden's "Discovery" World Discovery Place would lead to the watchmaker, Megalatro orders Hyman to drive him there. Megalatro drives a few blocks from where the watchmaker lived and notices the bank**

A bottle is just a bottle and a cup is a cup until they both meet the Formula! + This game was made with StoryJunkie, a new concept of game development. You can try it! Story Junkie is a new concept of game development. Just make an app, think of a story, a gameplay, and a composer. StoryJunkie lets you make your story come to life. Free the game by yourself. ♦About the Producer, Composer, and the Game Plan I`m Takao Oikawa. I do indie game development using Cocos2d-x on Windows. You can follow my twitter: I made this game in 4 days for the January Challenge at GameJunkie: This game was made for a long time in a small team: Soundless 2016 Soundless is a DJ Mix (6 hours long) for your headphones, made for the night of the soundless art festival in Helsinki, Finland, in the summer of 2016. The night was around the theme of the soundless night. The idea for this came from the night, where I played the music in the night to produce something very special. I also invite the night, who is a person, a tree, a flower, a light bulb, the stars, the wind and the clouds, the night the moon and the cold air. The music is from my latest full-length album 'UNSEEN' that came out last year in the end of 2016. The title is inspired by the Unseen landscape in a dark place. But of course it means something more than that. 'UNSEEN' is a very personal journey into my soul, very open and free.
