## DJServ [Mac/Win]

**Publisher's Description** DJService is a comprehensive software solution that allows you to create your own radio station and play all the songs you enjoy. DJService displays a user-friendly interface and allows you to effortlessly stream audio formats such as MP3, WAV, WMA, OGG and more. With it you can browse your entire computer and load all the songs you have, organize them into playlist and share them. DJService provides an easy to use player which comes with cover art viewer, progress bar, playlist preview, elapsed time indicator, skip and eject buttons as well as an 'AUTO' mode that when toggled, mixes all the songs together. As far as the library is concerned, you can add as many tracks as you want. The files can be added from any folder on your system and you can even use extension filters so only the ones you specify are taken into consideration. Once the library is created, it comes as a simple list with no sorting of whatsoever. You do however get to search the entire database using keywords and if you want to narrow down the search and reduce the time spent, you can tell the application to search information fields such as 'Artist', 'ID', 'ImageFileName', 'Path' and many more. It goes without saying that as a radio station solution, DJService allows you to create, store and manage playlists and you can also assign a large number of audio effects to custom buttons. This way you can instantly in play jingles and ads without interfering with the playlist. As a streamer, DJService comes equipped with a decent amount of tools that are destined to improve and enhance the quality of your station. You get to use a scheduler, configure the Airplayer, add plugins, rip audio tracks from CDs and record your sessions. With the above to consider and much more to discover in the details, DJService is by all means a reliable and practical tool you can use to create your own radio station. DJService Supported audio formats: DJService Features: It offers a user-friendly interface Allows to organize music files into playlists Can be used to stream music over the Internet Can be used to rip audio CD tracks Its easy to use and allows drag and drop functionality It supports various audio formats Enables recording sessions Schedules playlists Allows you to share playlists to your friends aa67ecbc25
