Players are the heart of FIFA. From friendly matches to one-of-a-kind competitions, FIFA gives fans a chance to play, learn, and compete like never before. Gameplay FIFA 22 has many gameplay innovations, including in-depth goal celebration controls and a flexible pass completion mechanic. Players can be physical on the field, dictating the pace of the match and open up new attack angles. "We did a significant amount of work to improve and widen the differences in player styles," said Matt Prior, Senior Producer, FIFA. "It's incredible how much we've done to enhance this rich feature set and really give each player a distinct personality and playing style." Power of FIFA Power of FIFA is the technical and mental challenge in FIFA 22. The new three-step ball physics system captures every touch of the ball, including its breakages, more finely than ever before. Career Mode Fans who aspire to greatness can build and manage their own player journey in Career Mode. The new Player DNA technology gives players the ability to cultivate their own unique playstyle and style of play. This means you can mix and match players from the same Club or internationally with their own unique playing styles, build your own team, and find the perfect "X-factor" to take your career to the next level. Pregame Pregame lets you manage matchday details including injured players and the Team Tactics card. This is your chance to review the stadium, opponents and your own tactics for the match, and decide what you need to do to score! Game Modes In Career Mode, you create a player and build an enduring career. This year you can switch to My Career at any time and make changes to your character. FOOTBALL ANALYTICS Progression is a big part of FIFA, so we've introduced Football Analytics to FOOTBALL ANALYTICS. Football Analytics allows you to understand which players are performing well. For example, can you predict what a certain player will do? Is he a natural goal scorer? Are these the best players for the aerial ball? This information gives you the tools to understand why certain teams and players are performing well. Use it to make your decisions and to adapt your game. Free Kick Free Kicks are back! What's new in Fifa 22:

- **Player Vision** - Add vision to the new player collision logic. This means that every player can now see every opponent when playing on the field and react when one player takes possession of the ball by moving towards the ball's location.
- **Dynamic Stamina** - New system that more accurately reflects the amount of effort used when doing all manner of things.
- **Ball Physics** - New launch angles for lobs and balls that roll to and through the goalkeeper. Rejecting close range shots is also more accurate. The new, optimized interactions between the ball and player body improve the responsiveness and intensity of the ball.
- **Ball Discovery** -> Exclusive new feature that brings ball movement to life with the aid of two cameras: one above the pitch and the other below. This helps to give balls its unique movement in addition to define its path as it drifts across the pitch.
- **Touch Control** - Improve touch and grace in a way never before seen in EA Sports FIFA games thanks to a new refined system.
- **Recovery System** - Improve the realism of heading the ball in "FIFA Ultimate Team." Each player will pick up the ball in possession with differing degrees of motion depending on their direction of movement and whether they passed the ball or received it from a teammate. The system is dynamic and reacts based on the player's speed and direction.
- **New Pass Movements** - Improved pass options in a way closer to real-world techniques. You can now decide how to pass the ball, challenging defenders with different options such as the off-the-ball pass. Also, defenders may be closer or further away from the play depending on how long you have possession.
