"With over 1000 unique animation improvements and enhancements, FIFA 22 marks a quantum leap in animation quality," said Jake Graupner, Creative Director. "We feel this is the best-looking football game ever created and look forward to releasing FIFA 22 to the community in September." FIFA 22 provides players with a variety of gameplay and visual customization options that allow them to perform and control their own Ultimate Team (UT) moves. On-pitch controls enable players to execute realistic, authentic actions including headers, volleys, lobs, and crunching tackles. FIFA 22 features an all-new starting lineup and starting XI formation system, allowing players to quickly create unique starting formations before a match. Players can now also check which formations have been used by their opponents.

---

The new fielding system allows players to react and predict which player is in possession. Players can now build a repertoire of game-changing moves and stop players from dribbling into dangerous positions. Players can more accurately predict which player is trying to cut inside, and defenders will now offer more support when teammates perform high-risk dribbles. Players can now use the GoalKeeper technology to be more aware of their positioning on the pitch and know whether they can stop goal-scoring opportunities. Players can also now pass back to an attacker, and both defenders can now delay an on-coming run to make it easier to keep the player from making a play. Another new feature allows players to replay training situations, giving them the chance to build a sequence of inputs that will be available on-pitch. After the game, teams can analyze the

---

performance of a match and make their own custom replays from all the game-changing moments. Key Features The new "FIFA 22" campaign delivers more of the intense, in-your-face gameplay that people expect from the franchise. Based on new animation technology, players now feel more connected and more expressive in the game's most important moments. AI has been upgraded to automatically rally and communicate tactics with teammates. Players now have more control over their Ultimate Team on-pitch. New defensive system sees CPU controlled players retreat and become more tightly knit. More chance to avoid tackles as new Dribbling System creates more angles. Improved spatial awareness on the pitch and increased accuracy of off-sides. Camera work has been improved for greater player control. Players can now defend

# off-sides

## **Features Key:**

- FIFA Ultimate Team will also include every player ever to play FIFA – available in all modes. The new Passes and Skills Trainer adds the most detailed and varied training possible. The game will also feature scores of new players and kits.
- Career Mode
  - Offers a unique and rewarding journey as you play out your UEFA Champions League campaign and graduate from the youth ranks to the senior team.
    - Follow your chosen player through all levels of the Champions League and European Championships, experiencing things never before seen in a football game. From the training ground to the famous stadiums and training grounds, climb the ranks to celebrate every achievement along the way. We've created the most realistic player and player AI in a football game to date. Players will demonstrate and individual player performance and Real Player Motion tech will ensure players and opponents react appropriately to tackle you and the ball. Your performance and development are inextricably linked to your team's performance and to unlock more players, you'll need to defeat your team in competition and claim their top players as your own.
    - Stunning stadiums, stunning visuals – your whole experience is interactive and immersive. Watch TV and read newspapers and magazines at your clubhouse bench, join your team mates for post-training meals and put the ball up front and back in the premier league.
