This hands-on video tutorial will guide you through the whole process of making a video with Camtasia's screen recorder - walk-through of the different recording modes as well as how to adjust the playback features of the video afterwards. A final overview of Camtasia's editing features is also presented. Today's tutorial will focus on Camtasia's editing and sequence features as well as how to use them. After all, we get loads of requests for in-depth tutorials on the editing part of Camtasia. As usual, you can download the Camtasia 9 trial edition to try out the features yourself. You may simply want to create a small video introduction for your presentation. Don't worry, Camtasia makes that effortless for you. Step 1. Begin Recording The very first thing you do with Camtasia, is start recording. In the lower-right corner you can see a red dot that appears in response to your actions. When you've finished you can record another video (or you can stop recording). Step 2. Capturing Your Screen After you've recorded a short video, you'll want to capture the content itself. To do this, click on the Recorder button in the lower-left corner. You'll now see a screen recording mode. In order to record your entire screen, click on Full Screen and then release it to make sure that it's taking in all the objects in the current window. Step 3. Switching between Parts of a File Now that you've captured the screen, you can edit the video. You can navigate between the "parts" of a file by using the left and right arrows. You can also press Ctrl+Tab to quickly jump to other part of the file. Step 4. Aligning Video Player Once you're in the main window of your file, you'll b7e8fd5c8
