Check out the NAB2010 show schedule and you'll see that Thursdays are the best day to see all the gear that has been brought in to demo, so don't sit around on Thursday nights if you want the best chance of getting on the floor. I just sat down and did a conference call with the Resolve team and it's true, today we're running a big sale right now to drive site traffic to both the client and merchant sites. In fact, I'll be posting an update with complete details in the next couple of hours. Meanwhile, I'll continue to have inquiries and ask them what they're interested in. Re: Why is it so quiet? I'd make the connection with your system and the Resolve software slower....if you'd read the comments on the banner of this post you'd have seen many happy users. I have used the system for editing my Sony HD camcorder tapes and it is significantly better than what you're used to. The production quality is as good as any post-production system I've used for common video. Somehow, with all the graphic interfaces in the industry, I never heard of Resolve until just 5 years ago. Maybe you should stop and do the research. Re: Why is it so quiet? Hi crowley, Thanks for stopping by and for your comments. I applaud your remarks about our products and your positive comments about the way we run our business. Thanks. I also very much appreciate what you've done for Resolve over the last five years. Based on our experience with NAB2010 this year, I do hope you'll stick around and check out the Resolve-world soon. We're very much looking forward to working with you and your crew during the upcoming international and domestic television shows in Canada. Re: Why is it so quiet? For the past several years I wrote and worked at Canada's largest Television and Film Speciality store known as FESTIVAL Video, at which time I had access to Resolve and worked with it daily on several
