The Premier Baseball Management Simulation. The publisher's description for OOTP 22 is: Your favorite sports team is up to your every decision. Out of the Park Baseball 22 packs the most authentic, accurate, and detailed features in franchise history. Manage every aspect of your franchise, from trades to free agency, finances to scouting, strategies to personnel. From the major leagues all the way down to the minor leagues, the entire operation is under your control. The 3D graphics are incredible, the new coaching system makes a major impact on your team, and the best part: the game engine is more stable than ever! Out of the Park Baseball 22 will take you to new heights! An extract from the reviews found the following as positive and negative points: Negatives Well written, but there's nothing really new to add to the OOTP franchise. OOTP, does pretty much everything that the previous OOTP titles (22 included) did. However, the most important thing, that this is the first title in the OOTP series in almost 3 years, might deserve a higher rating. In my opinion, the 3D-mode of the game is not the best-seller that it could have been. I felt that the editor could have been more flexible with its template and designed board/schedule. The performance of the game could have been more improved. Even though the title lacks something new, it still is worth to have a try. OOTP is an astonishing accomplishment! For anyone that wants to make that big leap to go from a casual game to a more in depth, real, and immersive game, this title will make that jump for you. The franchise is already a great game, with a great community and frequent updates. However, the fact that this is one of the few sports games that goes beyond gameplay, to make it a big step forward in the sports strategy genre and world of sports gaming, will make this a real winner for anyone who doesn't want to have regrets playing it. I've been a fan of the OOTP franchise since the first release and this one is a real step up. Imho, it's well worth the 15€ price tag. Let's be real here for a second. The only thing the OOTP franchise has ever been missing is game depth. And after
