This era is remembered in our memory as the era of mass strikes and hard working of the masses for the defense of the socialist society... The atmosphere of life at the end of the 1930s was different from a more placid period of the 1920s. Then people were surprised and astonished by the appearance of the locomotive in the railway stations, which were plastered with exhortations to the workers: "Attention — there will be a strike!"...

More than that, these warnings were sometimes followed by actual strikes and conductors refused to work and the trains did not run! Over the last few days, this has become an ordinary, routine thing. While a few months ago people did not use trains much, at least they do not look like this. There are thousands of trains and locomotives that run on the rails today, while just a few months ago there were only hundreds. And now it is just a matter of time when we will be left with only two or three dozen locomotives... The locomotive shall return all capital to its carriers and provide a large proportion of the transport of coal, iron ore, and other raw materials. The locomotive has a good reputation, can transport a good load and a lot of passengers. The simulator experience of people is very important. You need a soft pad, because it is not easy to control a fast locomotive. Also, to be able to concentrate on a driving task, the track should be level. The author

claims that the quality of the graphics is very high. NOTE: The freight locomotive SO17 is not included in Trainz World. Video game modes: - Single player - He can participate in a quiz at the end of the game and receive bonus points - Multiplayer - Use the TzTrain.com service Storyline of the game: The end of the 1930s — the time of great and small events. Life has no rules at all, and the future of every person is unpredictable. The main character of the story became a railway policeman. He was thrown into turmoil by all the tasks that the locomotive has performed during the last few months. And now the greatest locomotive must return all the wealth that they have earned through their work. It is a railway police officer who in December 1930 must go to the coal trains, find the culprit and stop him for the theft of many tons of coal and to present it back to the coal company. What's new:

This is just a collection of the Moscow Locos, and Tenders, I found at the higher settings with up to 30 Cars in game. RULES The game "Trainz" is based on a real world (USA) railroad simulator 2015, and it use "DLC.rulr" made by me. The mod is now working 100%, its shareware, and its free, the creator of the product don't even know its exist, so the new version will be free and it will be named after the name of the DLC, with new version number. Information hidden on this mod is DEDICATED to modder 23751912292115, a member of the modding group dedicated to "DLC 3.4" chez fridaygeek, and he gave me free access to all his source codes, those of his brothers who are being mods, and he organized with me to find and put my secret train on his name. 1- Zenjiko and System Repair, makes the "Ryokans" to work and holds the city to the right place when loading the game. Now the non-important things (a note on the use of the name zenjiko on the tracklist) - Use of creative content in the game. - Joint sex. - Engine sounds. - Randomized freight: Endless amounts of freight : you will find a freight every 5 sectors with wagons and cars. Freight consist between 40-80

wagons, they come every 5-10 sector. VIP: - Because some of them are actually important cargo in cities, I made sure that they are now VIP ; they give a lot of freight at a rate of 4-5 unit per day, and it can be given every 3-5 sector. (Now it can be given on any positions) - Each VIP freight can be found just before a uncoupling track : like the Daffinshgalt VIP, and it can take anything from a dozen wagons to a few trainloads of cargo. 2- Tender: - Becareful with this, because tender can make any train crazy, he can even cause the train crash, they can be found on stop-point and offstation stops. - Tender can cause trains to lose or gain instead of gaining 5.36% of
