In this guide we will be looking at how to activate Office Suite 10 and Office Suite Plus 9.0 using the Office Suite 10 administrator. Clave de activacion del office suite 7 - así funciona el office suite 7 activado para pc. Q: `argv[0]` method not a pointer so, I am having problems running this section of code: `if ((argv[0]) == &action) {` I get an error saying that 'argv[0] method is not a pointer. I don't understand why. I thought it would just be the same as saying `argv[0]` \*and\* having an `==` operator. How can I make it that it acts like a pointer? Thanks, A: `argv` is a pointer. You can't use `!=` on a pointer. So, you need to cast the pointer to a pointer-to-char, or you can just use `strcmp` on a string: `if (strcmp (argv[0], "action") == 0) {` A: `argv[0]` is a pointer. You can't compare it to a string in C. You need to compare it to a string. If you want to know where that string came from: `const char* argv_get_param (int argc, char* argv[]);` If you need it later: `char* argv_get_param_string (int argc, char* argv[]);` A: `argv` is a pointer. The
