Flexbeta FireTweaker Download

FireTweaker is a Firefox Tweaking utility for creating the most customized and fun web browsing experience possible! Flexbeta FireTweaker will tweak and optimize your Firefox browsing experience according to your Internet connection and computer performance. It is the ultimate Firefox browser customizable tool for firefox users around the world. This version has 25 different tweaks and optimizations, tweaks such as: Speed dial updates, improved bookmarks, auto popup and more. The application now includes a unique "Backup & Rollback" function to ensure you can easily rollback any settings you change to their default settings. You can configure this function to save a backup of your current Firefox settings whenever you close the program. The user interface of this application is now easier to use, provides a more dynamic and custom Firefox experience. Along with this, an intuitive and easy to use tool is now a standard feature of this application. Please visit the Freelexbeta website for some additional information about the application. For more information, visit our website: www.freelexbeta.com Thank You and Enjoy!
