Adobe Photoshop Elements: The overview What sets Photoshop Elements apart from Photoshop is that it has a different interface and view options. In most cases, Photoshop can be just as powerful as Photoshop Elements for image editing, but it takes a little more effort to learn how to use the program. Photoshop Elements offers more options, letting you use

a larger canvas and zoom in and out. You can also edit the colors that appear in images and change their brightness. There are other tasks that can only be performed in Photoshop; for example, you can use Content-Aware Fill to remove unwanted objects from images. Adobe Photoshop Elements: The easier-to-use interface In addition to the different interface, Photoshop Elements has a simpler user

interface than Photoshop. For example, when you open a folder of images, you need to open one of them to start editing it. If you open the folders using the menu, you can easily edit several images in a row. For example, you can open four folders at the same time and start editing the images in all four of them. Editor view in Photoshop Elements Using the controls on the side of the screen is faster than

clicking through several windows. Side view in Photoshop Elements Creating images with many layers or a high resolution is more difficult to do in Photoshop Elements. You can use layer groups to organize layers and move between them, but it can be a hassle. For example, you must use Layer Properties to move the layers; you can't drag layers between the layers pane and the Layers palette. Using layers in

Photoshop Elements The help system in Photoshop Elements is very good. The Help menu offers troubleshooting help, many tutorials, and a tutorial for beginners. You can use Color, Adjustment, Filter, Gradient, and Pen tools in

Elements, and the tools perform the same functions as in Photoshop. The major difference is that Elements has fewer tools. Elements only has one crop tool, two blur tools, one healing tool, and three sketch tools, compared to more than 25 tools in Photoshop. Adjustment and Filter tools in Photoshop Some adjustments and filters available in Photoshop are found in Photoshop Elements. Some adjustments are

down the river' Nick Clegg has said he is not afraid of "losing his job", after his party suffered its worst election result since 1935. The Liberal Democrat leader told MPs there was no "humourous conspiracy" to keep him out of government. After the party was relegated to fourth place, Mr Clegg said it was "not the job" of the Lib Dems to "sell your country down the river". Deputy Prime Minister

Nick Clegg has said he will lead his party into the next election. This was the party's worst performance in the House of Commons since 1935. 'Hang in there' Mr Clegg said: "We are here because this is the people's

government. The people's government is made up of people like you, my friends, and that is what gives it its strength and confidence." "If [the Lib Dems] were in government I do not think that we would be standing here, and I would say to the many who do not believe in the Liberal Democrats, you hang in there, you will see our day come."
