RiyazStudio mini is a simple to use application that allows you to play various Indian music. Combines freeware Tanpura with licensed Tabla (with a 30-day moneyback guarantee) in a compact and responsive practice suite for performers and students of North Indian Classical Music. You can adjust the sounds by changing their volume and bitrate, then you can save your settings or import previously saved ones. RiyazStudio mini is actually the first program that will sound like a real tabla player - because it uses real recorded tabla loops, rather than mechanically placing tabla bols at regular intervals. Tabla tempo is finely adjustable from vilambit (very slow) to ati drut (very fast) - and can even be set by tapping a key at the desired speed. Bandrec, Melodyne, MetadataEditor and other music editors are available to help you with the editing and processing of your music files. RiyazStudio mini Features: - Tabla, Tanpura, Flute, Harmonium and Djembe - High quality sound files - Simple and easy to use interface - Tabla (drut and vilambit) played ati drut and vilambit tempo - Optional equalizer available - Single and double banked Tabla - Tabla tempo adjustable from ati drut to vilambit - Tabla tempo can also be set by tapping a key - Real recorded Tabla - Can play a specific part (recommended for practicing a difficult part) - Supports recording playback of the Tabla and Tanpura and playback of the selected part of the Tabla - Freeware Tanpura and licensed licensed Tabla - Tabla bols rebased to match your Tabla - Tabla beat match - Take a screenshot of your music files - Export your music files as a wav file. You can record, edit and process any song with this module. In RiyazStudio, you have the following options: * Tabla or Tanpura Tabla Drut or Vilambit * Tabla patterns * Tabla volume * Tabla beats * Tabla instrument * Tabla velocity * Tabla key * Tabla crossfader * Tabla crossfader position * Tabla color * Tabla guide notes * Tanpura volume * Tanpura instrument * Tanpura aa67ecbc25

-plays tabla sounds recorded from tablas at real tempos and real bitrates -sounds of tabla recorded at HQ Sampler - to get the highest quality sound -extra small : less than 10 MB (almost a tabla player in itself) -minimalistic UI design : when you minimize it you get a smaller icon than the size of your desktop screen -only 1.5 MB and comes without any activations or inclusions

Pulse-Pulse TV [beta] is a free, open source, Java-based video stream server that can be used to convert and play TV (and radio) streams on a PC. The primary purpose of Pulse-Pulse TV is to allow the fast and easy conversion of MPEG-2 video streams into various other formats that Pulse-Pulse TV can play. Pulse-Pulse TV can be set up to run in stand-alone mode or to be embedded into an web browser using the Java applet technology.
