Guild Wars 2 share fondly in a conversation with a guy who shares the same love for music and recording. Chris constantly has something new going on, and it is at odd times like this where you get the 'aha' moments, and it makes getting up in the morning an absolute pleasure. So when we started this project, I never thought it would come to fruition as it does, and I never imagined it would capture the way it has done. Once I stopped and re-thought things about myself and my future in life, the m1Audio system is exactly how it has to be. I talk to myself everyday and I see that this is the direction I need to go with. Chris and I have now created something that will look great in any home. Chris has created a beautiful box, with his trademark design and attention to details to something we will never forget. It's not just the monitor that is a masterpiece. It's the overall design, audio quality, controller software, looking back at Chris's work, not only in the mixing room, but everything he has done in his life. It's something I will be honored to have on display in my lifetime. *Headphones used for testing purposes only, usage was not

From: Tribal art, in spite of the many weaknesses, has great potential. Such an illustrative discipline, based on the task of expressing the essence of a culture or race, is regarded to have a very long tradition and may even go all the way back to ancient times, when gods were still believed to live in human bodies. Not only historical art, but also the illusory world of dreams and mythology contains a number of tribal art images. The latter are images that can be characterized as bearer-like, in the sense that they exist in the realm of spirit, rather than in the real, physical world. Spirits are described as immaterial beings and for this reason they have also been called "spiritual beings" to avoid confusion. In the dream world and in the world of myths they are endowed with supernatural powers, which means that they take on a life of their own and speak and act independently, which makes them very difficult to resist. From ancient times a very broad range of genres has been developed that are based on the creation of illusory worlds. The genre that is probably the most familiar is film fantasy. It has been around since the beginning of cinema. Although in earlier times, the creators of fantasy films created religious images and scenes, those depictions are very rare today. In most cases now fantasy films are created in a much broader sense, just as adventure films and film serials. This allows for much more elaborate depictions of mythical stories, the aim of which is not to depict a religion or a specific culture, but to create a world in which the imagination of the viewers can become almost fully active. Fantasy film does not mean that it is impossible to convey religious feelings, but to depict a culture that is "based on facts" is no longer a goal of the genre. One of the earliest examples of an image of a tribal art was created by an artist of the Perugian school in the fifteenth century. It may be a small fresco, but it is a very recognizable example. The image shown here is from a 1445 painting by the artist Veneziano di Giesu. The artist's craft is not limited to painting, rather in this case he created a series of frescoes, which came to be known as "tribal art". A great number of the so-called "tribal art" frescoes have survived until

In the game, the battle system is similar to the combat system in Dragon Quest X, but with a twist. What makes this new gameplay unique is that the game does not use the auto-targeting system for the camera. Instead, the camera is always staying close to the player character. That means that enemies can be seen and shot before they are actually spotted. This system is called "Camera Lock-on." The camera lock-on also changes depending on the enemy type. The 3D camera angle has been optimized for the new system, and the combat graphics are also unique. In addition to shooting, you can perform moves such as combo attacks, heavy attacks, and slashes with special weapons. Skill-use has been incorporated into the action. You can use your skills as much as you want during the battle. Weapons You start out with your own weapon, but you can equip a weapon you find in battle. As for weapons and armors, there are a variety of weapon types, such as swords and daggers, as well as a wide variety of armors. The weapons you equip are not limited to weapons you can find in the game. You can craft weapons and armors by yourself. You can see your craft levels in the menu during battle, and you can see your craft rate on the bottom of the screen during battle. We have prepared a number of impressive weapons, and will be adding more as you play. Please wait for the updates! 1. Sword This is a swordsman's weapon. It's not a great weapon, but it's certainly not bad. One thing that is unique about this weapon is that you can use it without having to jump. Sword Play This weapon is easy to use, but the attack power is limited. You can use enemy's defense (like Parry) to guard, and attack the enemy in the back. Equip and Upgrade You can equip another weapon in the weapon slot in your inventory. You can also find weapons that add extra effects when used. You can find new swords during your journey. Crafting Materials You can find materials to craft weapons and armors on the map or during exploration. 2. Strike Dagger This weapon is great for a dagger wielder. You can use the Hilt, an attached sword, to charge the strike, and add extra effects to the attack. You can use the speed of the strike to
