Hi guys, we all know what exactly demoscene is about. But we all don't know about its origins. So now let me tell you the story. i2 Technologies to develop demoscene. The first demo known to us was made in the sixties by a Finnish student by the name of Jarkko Oikarinta. It was called "Playquest" and the recorded as such. Its fun, but you should not stop there, in that moment, I got the idea for the i2 Technologies project. It is 'Paranoiittsumppu' or 'Paranoia compiler'. But what can it do? How should I say it? This 'Paranoia compiler' is, well, a compiler for demoscene. Like it says, it is a 'paranoia compiler' or a 'demoscene compiler'. It allows you to build demos very quickly. So, now it is time for you to download i2 Technologies Paranoia compiler, its latest version, and use it. I hope you will like it. - Version 1.2.1.1 (For Windows) - Runtime Licence - version for Demo Scene-20180525- - Cross platform License - for demo scene and others. - Redistribution License - in binary. - "Paranoia Sequencer" - is included. - Its version is 2.8.7.1. So guys, i hope you enjoy using the i2 Technologies Paranoia compiler, and make more demoscenes. Enjoying Just like the name says, it's another superior and the best android ereader.
