and here is the download link for the windows vista ultimate extras in compressed zip file: />note: i will add a second download link for these games at the very bottom of this post. you can also download them from the following link: the microsoft.net framework 3 is the new managed code programming model for windows. it combines the power of the.net framework version 2.0 with new technologies for building applications that have visually compelling user experiences, seamless communication across technology boundaries, and the ability to support a wide range of business processes. these new technologies are windows presentation foundation, windows communication foundation, windows workflow foundation, and windows cardspace. the.net framework 3 is included as part of the windows vista operating system; you can install it or uninstall it using windows features control panel. this redistributable package is for windows xp and windows server 2003. the latest version (3.5) contains many new features building incrementally upon.net framework 2.0 and 3.0, and includes.0 service pack 1 and.net framework 3.0 service pack 1.compressed version, only 60 mb - work well with all software. download from mediafire pass: www.namln.com however, this dpi independence can create irregular edge rendering due to anti-aliasing. these artifacts, commonly seen as blurry, or semi-transparent, edges can occur when the location of an edge falls in the middle of a device pixel rather than between device pixels. to address this

---

issue, wpf provides a way for object edges in a visual tree to snap, or become fixed, to device pixels through pixel snapping, eliminating the semi-transparent edges produced by anti-aliasing.
