i'm looking for a way to play the song "ending" for attack on titan. there's already a method to play the song in the game, but it doesn't work for me. i found a method online where you download something and put it in the game's folder, but it doesn't work, either. i'm trying to find a way to play it because it's awesome. any help? the d3dx9_42.dll file is not in your game folder, because the game isn't in your game folder. you have to put the d3dx9_42.dll file into the game folder, and the d3dx9_42.dll file you downloaded into the game folder hint: in a game like this you need to get to know your own hands like the back of your hand and you need to let yourself think about music in a way where the default will just be to sing the part you're playing... if you're trying to play something hard, this may take a little while longer before you can just think about the music as you play; in the end, you shouldn't be able to only think about the music you're playing as you play it but rather have the thoughts/knowledge at hand as well. this game is excellent. rocksmith is an awesome game, and i am happy that they have released a version that still allows play on a guitar but with actual guitars connected to the game. the people who are complaining about the price should also consider that it is a monthly game for only \$29.99. if that makes it hard for you, then just learn to play on your guitar and get a real one, then you can start making a new band or get lessons from an actual expert player. good luck! so as a guitarist i really don't like it. i feel like it's more of a recorder than anything. as far as the cost. for what it's worth, i bought both the guitar and bass packs together. so i got a nice price, i think. i'm still waiting on the rhythm pack though. 5ec8ef588b
