Stat Transfer Free Download Full 14

with the use of stattransfer, you can easily move data between any popular statistical packages without re-collecting the data, re-formatting the data or generating a new data set. stattransfer allows the user to specify data files by a variety of options, including the setting of variables, the labels of the variables, column names and column formats. stattransfer is a free tool, yet it is powerful and reliable as well.

stattransfer has a powerful and easy to use user interface. stattransfer allows users to read the data from any statistical packages and the program can create the same files and save the file names in the same location as the original file. the most important feature of stattransfer is its ability to directly convert various statistical packages which includes northwind, flatfile, largefile, r and sas enterprise guide. a wide range of options have been provided in stattransfer to allow the user to save the data from any program as a

normal file, and to transfer the data back to the same program as well. in addition, stattransfer can also be utilized to read and write sas data to sas files and sas data to excel files. statstransfer is created to simplify the process of moving, converting or importing various statistical packages to any other applications. it is designed to save you a lot of time and resources. the system of the gui can be divided into four parts: the statistics menu; the options menu; the status menu; the tool menu. in the statistics menu, there are 4

statistics, such as descriptive statistics, table statistics, dimensional table statistics, and graphs. in the options menu, there is a variety of options, such as the stats text file, whether to clear fields, the data storage, data types, the sort order, the data summing, the data file type and path, and the way to close a program. in the status menu, there are the settings of the program, such as sending commands, window size, number of graphs, graphs color and font size.
