I really like this music player. I have an X-Fi Titanium and I enjoy using it to play WMA files. While I have no issues with WMA, I need to switch to WMA Lossless Streaming Audio (WMA-LS) if I want to play WMA files online. I also have a problem with WMA-LS. Despite every description I read saying that the format was essentially identical to WMA, I found that when I began to play a WMA-LS file, I found it to be very noisy and out of tune. I used WMA-LS-X-2.1.0.7.0.1 to see if that would help, but to no avail. I tried to play a WMA-LS file using WMAPlayer 3.0.0.1 and the sound was very smooth, but when I went to the WMA-LS page to play a WMA-LS file, it took
