### **What's New In?**

OurStickys is a powerful note-taking extension for Chrome.

Using OurStickys, you can write notes or to-do lists and organize them into channels, which are

accessible from the extension's main menu. You can organize your notes into channels based on their main topic or any other factor. OurStickys is a combination of a to-do list, sticky notes and a calculator. You can use it for school assignments, work, events and other purposes. Instagram is taking over the world -- at least the social media world -- and not only has it become a visual "word of mouth" influencer, but now it's also becoming a powerful tool for businesses and brands. In addition, it's an ideal location to

promote products. And, given the enormous popularity of this photo-sharing platform, it's a perfect place to show off your own business too. So, what can you do with Instagram? Can you promote products? And, if you do, will your audience take you seriously? All of the following examples of using Instagram to market products are easily accomplishable through the Instagram app itself. But, they also make great social media campaigns, since they allow for an interactive experience. Let's start with putting up a photo that's telling a story about your business

or brand. Then, you can share that photo with your followers on Instagram through your feed and they can like or comment on it. This will then show up on your feed, so, you can keep an eye on what people say about your business. It's the same for your followers, too -- they'll be notified that you've posted something new. If you use Instagram Stories, you can post a photo or video that's time-limited and only shows up on your followers' feeds (think Snapchat). You can use the same features to post content to your business' own feed, but you can

also control it like a social media site, so you can post at times when your followers aren't there. And, finally, if you use Instagram Live, you can also connect with your followers and let them in on your business or brand story. Plus, it's a great way to engage with them and to share behind the scenes content about what you do. Once you've made all of these changes, you'll start to see that your followers want to check out your business and follow it. If you want to see the effectiveness of Instagram for your business, you can also reach out to your

customers on Instagram and ask them for opinions about what they think about your brand or business. This is a great way to get some feedback from your customers, so, you can improve it or stay the course. It's true that Instagram may seem like a great way to market products, but it's not the only way. Here's another example: You can use Instagram to create a contest or
