Record the activity on your screen The first utility comes in handy when you want to effortlessly capture the activity on your screen, either the full area or a custom defined region. Due to the provided hotkeys, you can pause or stop the recording using solely the keyboard. You can choose the default target format (FLV, MP4, AVI, WMV), then define the preferred quality level, resolution and FPS, along with the destination folder. The mouse pointer can be visible in the recording or it can be hidden, it all depends on the settings you set up. You can even assign effects to be played when pressing the mouse buttons. Comprehensive video editor Once you have recorded a video, you can proceed to enhancing it using the built-in toolbox. Alternatively, you can add multiple clips stored on your PC, since numerous extensions are supported. Next, you can not only convert them to other formats, but you can also tinker with their video size, quality, aspect ratio, frame rate or codec, and audio channel, quality or sample rate. The actual enhancing of the video begins when you want to cut, rotate or crop it. When it comes to the effects, you can create a sequence or an alternation of video effects and zoom. When using the screen recorder, you can add a text or an image watermark, yet the toolbox also supports video and shape watermarks to the positions you manually choose. Adding audio background or subtitles is similarly easy to set up. Conclusion All in all, ThunderSoft Screen Recorder Pro can offer you most, if not all, the functions you might require to capture video and audio activity on your screen, then editing the resulting video within the same app. ThunderSoft Video Editor Pro 11.4.2 [Patch] is an excellent video editor with a powerful editor.
